

Foresight activity- Workshop

Local Workshop
March 3th 2012

Agricultural policy and the common good: Between knowledge and sustainability

Short background:

20 is now a magic number when you combine agriculture, knowledge and environmental. 20 years since the first reform of the CAP which clearly place the theme of ecological compatibility of European agriculture. 2020 is the deadline for the next round of application of new CAP currently under negotiation. also the Horizon 2020 is strategic for the research and innovation community.

Objective:

Rio + 20 is the upcoming World “rendez-vous” for update planetary commitments on sustainable development. It is appropriate to draw a common thread between these appointments that can sew the climatic and environmental sustainability of production and consumption patterns and food with the knowledge networks capable of rewarding participation of producers and ecological and social specificity of territories.

Content of the activity:

- Presentation of principal topic on agriculture to the Rio+20 “Zero Draft”
- discussion on the connection between Rio + 20 and CAP reform
- understand the opportunities for joint actions and possible common strategic positions

Method:

After a presentation of all elements available to you these thematic rapporteurs, there will be a reflection shared with participants
